

# BTEC Tech Award in Enterprise

This course offers learners a practical introduction to life and work in the enterprise sector. Enterprise is a key part of the business world and plays a significant role in the UK's global economic standing, with SMEs contributing to around half of the turnover in the UK private sector. This qualification gives learners a broad insight into entrepreneurship and the skills, knowledge and attitudes that underpin it.

This qualification provides a strong foundation for learners looking to progress to further business education at Level 3, such as the BTEC National Diploma in Business or A-Level Business. By completing the Level 2 Tech Award, learners will gain valuable insight into the skills, knowledge, and attitudes essential for entrepreneurship.

This course equips them with a range of employability skills, helping them make informed career decisions and preparing them for future opportunities in fields such as marketing, finance, human resources, accounting, management, and other key areas within the business sector.
